## June 2009 E-Newsletter

### WINTER WARNING ! Protect against power spikes

With winter upon us, if you do not have a power surge arrestor installed in you power meter box, your PC could become a victim of a lighting strike. Valuable computing equipment can be damaged in a split second if the power lines around your house are hit during a lightning storm. The simplest method of protection is with a Surge Protector power board starting at approx. \$20. Or a unit with an inbuilt Uninterruptible Power Supply (UPS) will ensure power is maintained to your computer during any power outages. These start at \$120.

*Special price until 30th June — Belkin 4 way surge protector — only \$18*

### E-MAIL ON THE GO! Mobile 3G Broadband

Are you enjoying the freedom of a notebook and wish you could have mobile internet access too? Computer Wizz has a number of solutions available from prepaid (pay as you go) to contract based 3G Mobile broadband connections. These connections are very simple to install and allow you to collect your email or browse the internet from anywhere, local or interstate. Commencing from \$20 per month, prices vary depending on internet provider.

### A Computer Wizz revamp may just help your tired PC come back to life.

Is your PC struggling to keep up, but not that old? It may benefit from a system overhaul and checkup. Over time, a windows based computer will slow down from programs being installed and uninstalled, from lots of data being created, or maybe the odd virus or two. Computer Wizz can give your PC a new lease of life, bringing it back to how you remember it when you first took it out of the box. We can refresh your system back to factory and upgrade your memory to enable your PC to run smoother. Just like your car, your PC will run more efficiently with regular servicing.

No obligation quotes available.

### This Months Recommendation
